PROGRAMMING LANGUAGES

- Python
- C++
- Javascript
- SQL

BACKEND & DATABASE

- Node.js
- Express.js
- Flask
- PostgreSQL
- Prisma
- RESTful APIs
- JWT Authentication
- OAuth 2.0

AI / DATA / TOOLS

- Python
- TensorFlow
- Keras
- NumPy
- Scikit-learn
- Git & GitHub
- Postman
- Docker
- Redis
- BullMQ
- Socket.IO

SOFT SKILLS

- Project Management
- Teamwork
- Time Management
- Leadership
- Critical Thinking
- Mentorship & Leadership

PROFILE

Backend Developer and AI Developer with hands-on experience building modular REST APIs and backend systems using Node.js, Express.js, TypeScript, Python, PostgreSQL, MongoDB, and Prisma. Experienced in implementing JWT authentication, RBAC, database-driven workflows, real-time communication, background job processing, and AI-powered learning features. Built and tested end-to-end projects including an LMS-AI backend and a modular Hospital Management Platform. Interested in developing secure, scalable, and maintainable software systems.

PROJECT

Missing Person Detection System & FindMe React native, Node.js, Express.js, MongoDB, Mongoose, JWT (JSON Web Tokens), express-validator / Joi, dotenv, Python

- Built a missing person detection system using face recognition and backend APIs to identify potential matches from stored image data.
- Focused on accuracy, performance optimization, and secure handling of personal records.

VertexLearn AI: Learning management System Node.js, Express.js, TypeScript, PostgreSQL, Prisma, Docker, JWT, RBAC

- Developed a modular RESTful backend supporting students, instructors, and administrators with role-based access control.
- Implemented courses, enrollment, lectures, progress tracking, quizzes, assignments, certificates, badges, streaks, rewards, and student analytics.
- Built gamification and AI-learning backend support including point wallets, rewards, learning streaks, AI Tutor, RAG/document workflows, flashcards, and personalized learning features.

MedCore — Hospital Management Platform Node.js, Express.js, TypeScript, PostgreSQL, Prisma, JWT, RBAC, Redis, BullMQ, Socket.IO, Twilio, Docker

- Developed a modular hospital management backend covering patient care, appointments, OPD/IPD workflows, admissions, bed allocation, pharmacy, diagnostics, procedures, billing, and payments.
- Implemented authentication, RBAC, audit logging, real-time notifications, Twilio SMS, Redis/BullMQ background jobs, and automated appointment reminders.

EDUCATION

JIS COLLEGE OF ENGINEERING, KALYANI September 2022 - June 2026
Computer Science & Engineering Bachelors Nadia, West Bengal
CGPA: 8.11

Kotalpur High School (Secondary & Higher Secondary) Jan 2014 - July 2022
95%, 91% Kotulpur, Bankura, 722141

CERTIFICATIONS

- AI Agent Architect — IBM SkillsBuild, 2025
- AWS Cloud Practitioner — Amazon Web Services, 2024
- Generative AI Specialist — Google Cloud / Coursera, 2024
- AWS Machine Learning Specialty — Amazon Web Services, 2024
- Python for Data Science — University of Michigan / Coursera, 2024
- AI/ML Virtual Internship — AICTE / Eduskills, 2024
